PRODUCT CATALOG **2025** Core Drilling Tools & Equipments

About Us

Harsukh Indorock Pvt. Limited, headquartered in Pune, Maharashtra, is a trusted name in Mineral Exploration & Diamond Core Drilling industry, offering a blend of quality products for geologists, mining experts, drillers and exploration companies.

Established with the vision of becoming a benchmark in exploration innovation, we have consistently delivered high-quality products that meet the dynamic needs of the mineral exploration sector.

Our state-of-the-art manufacturing facilities focus on precision engineering, ensuring our products uphold the highest standards of durability, efficiency, and reliability. With a strong focus on sustainable practices, we are proud to cater to diverse geological environments while building lasting partnerships.

Our Mission

To design and deliver superior-quality exploration products through constant innovation and rigorous quality control, helping our customers push boundaries and discover new frontiers.

Our Vision

To revolutionize the mineral exploration industry with innovative, sustainable, and affordable solutions that empower the success for our customers globally.

Leadership

Led by a team of seasoned professionals with decades of experience in the exploration and drilling industry, Harsukh Indorock thrives on creativity, operational excellence, and a customer-focused approach. Our leadership team fosters a culture of adaptability and innovation to anticipate and meet our clients' unique challenges.

INDOROCK

EXPLORE TO EXCELLENCE

Pioneering Excellence in

MINERAL EXPLORATION

built on the legacy of Harsukh Indorock Pvt. Ltd.

Indorock delivers cutting-edge exploration tools trusted by global geologists, mining experts, drillers and exploration companies.

Drill Bits

| Indotray® Core Trays

Core Drilling Diamond Tools

INDOROCK
EXPLORE TO EXCELLENCE

Indorock diamond bits deliver fast and long-lasting performance across all rock types— with an easy selection system to match every job.

Performance Advantages

Self-sharpening diamond bits for continuous cutting. Indorock delivers premium performance across all formations.

Wide Range of
Application

20% Fastest
Penetration

30% Longer
Service Life

Green Series

Soft-medium, abrasive,
fractured, competent

Red Series

Hard-extremely hard,
competent formations

Blue Series

Medium-hard,
slightly abrasive, competent

Diamond Bit Selection Chart

Rock Group		Formation Description	Rock Type	Indorock Matrix
Moh's Scale	1/15 scale			
1-4	1-4	Soft-medium-hard	Conglomerate, Sandstone & Hard Shale	Green Matrix
		Highly abrasive, coarse grained & fractured		
5	6	Medium-hard	Limestone, Granite, Serpentinite, Peridotite	Green Matrix
		Medium, coarse-grained competent, or fractured	Dolomite, Granite, Gneiss, Quartzite	
6	8	Medium-hard	Basalt, Diorite, Gabbro	Blue Matrix
		Non abrasive/broken		
7	9	Medium-hard	Greywacke, Skams, Pegmatilte, Silicified volcanics	Blue Matrix
		Medium broken competent		
8	11	Hard-competent	BHJ, BHQ Chert, Jasperite, Rhyolite	Red Matrix
9	13	Very hard		
		Very competent		

Heavy Duty Reaming Shells

Maintain hole diameter, stabilize drilling, and ensure smooth cutting.

Casing Shoe Bits

Drill and set casing with precision-cutting segments and smooth inner design for easy tool passage.

****Note:** We customize bit profiles and crowns to match your ground conditions. Contact us for the ideal drilling solution.

High quality premium plastic **Core Trays**

Indotray provides durable, ergonomic plastic core trays and accessories for secure sample storage in mineral exploration.

Problems with existing trays

No Durability

No stacking

Rusts & Breaks

Core Losses

Performance **Advantages**

IndoTray is made to withstand the harsh conditions of Exploration Sites. With best in class stacking, comfort features, our core trays are loved by geologists all over the world.

High Strength
& Durable Plastic

UV and
Heat Stable

3 Tons load
capacity, Tested!

Upgrade your core storage with our **Plastic Core Trays**

Manufactured with Polypropylene Granules

Stackable
Easy to handle
Safe to use

High-strength plastic
Chemically inert
Non-magnetic

Termite/insect resistant
Rust-free
UV stable

Specifications & Accessories

Core Separators

World's first Column Locking System for core trays

Tray Lid Cover with Lock

Aluminium ID Tags

Customized logo printing on tray

Wireline Drill Rods

INDOROCK
EXPLORE TO EXCELLENCE

Drill rods are vital for power transfer, depth reach, and accurate, efficient drilling with minimal risk of failure.

Q Series Drill Rod Specifications

Premium Steel
Made from top-grade,
globally certified steel.

Quality Testing
Each batch is thoroughly
checked for defects.

Low Hoop Stress
Prevents bending
under drilling pressure.

Perfect Straightness
Minimizes vibration
and drilling issues.

Q thread drill rods are trusted for medium to deep drilling. Built to high standards, they meet the evolving needs of modern exploration with durable parallel wall construction.

Technical Specification

INDOROCK
EXPLORE TO EXCELLENCE

	BQ	NQ	HQ
Rated maximum depth (m)	1500	2400	1800
Outer diameter	55.6	69.9	88.9
Inner (Tool joint) diameter (mm)	46	60.3	77.8
3m rod weight (kg)	17.9	22.7	34.3
TPI	3	3	3
Bundle spec for 3 meter	19	19	19
Bundle gross weight	355kg	453kg	682kg
Rods/20' container	798	570	380
Rods/40' container	1064	855	570
Raw material minimum specification			
Yield strength minimum	690Mpa		
Tensile strength minimum	820Mpa		

Performance Advantages

Straightness

Drilling Additives

INDOROCK
EXPLORE TO EXCELLENCE

High-performance, eco-friendly solutions designed to boost drilling efficiency while protecting the environment. Safe, effective, and sustainable.

Performance Advantages

Eco-Friendly
Non-polluting,
biodegradable products

Cost-Efficient
Reduces wastage and
lowers drilling costs

Performance
Improves penetration
rates and hole stability

Water Versatility
Best in fresh, hard, and
saline water conditions

Fluid loss control agent

Supermix Liquid

High-quality PHPA emulsion for viscosity, fluid loss control, and borehole stability in water-based drilling.

Advantages:

- Improves** hole stability and inhibits water-sensitive formations
- Reduces** rod vibration and provides lubrication
- Lowers** filtration rates and improves core recovery
- Works** effectively in fresh, hard, and saline waters

Fluid loss control agent

Supermix Powder

Highly dispersive PHPA powder for viscosity and fluid loss control, forming a protective colloid without fisheyes.

Advantages:

- Disperses** rapidly even under poor mixing conditions
- Enhances** core recovery and penetration rates
- Reduces** friction and frequency of differential sticking
- Supplements** bentonite-based drilling fluids effectively

Foaming agent and detergent

Superfoam Liquid

A blend of anionic surfactants formulated for air drilling operations in mineral and oil & gas exploration.

Advantages:

- Produces** stable foam at economical concentrations
- Compatible** with all water types (brackish, salty, hard)
- Reduces** erosion in poorly consolidated formations
- Improves** hole cleaning and increases penetration rates
